Illustration 3: The item on ebay (sample)

Introduction

What does it do?

Deal! is the Quick Shop interface for the marketplace ebay. You can manage all items with TYPO3 and publish it on ebay. Amazon is under construction[1].

Deal!

- is extending the TYPO3 Quick Shop with an interface for the marketplaces amazon[2] and ebay

- enables you, to manage all your items with Quick Shop

- publishs your items at the marketplaces amazon[3] and ebay

- updates your item on amazon[4] and ebay automatically, if you update your item in the Quick Shop

- enables you to configure basic properties of your item for the marketplace ebay.

What does it not do?

Deal! isn't a web interface for managing items at amazon or at ebay in principle.

- It doesn't substitute neither the amazon interface nor the ebay interface.

Deal! isn't suited to manage items with complex specifications like

- complex calculated shipping costs

- cross selling

- variants

Limitations

Synchronisation

Items are synchronised one way only – from the Quick Shop to amazon and on ebay:

- If you update your item in the Quick Shop, Deal! will update this item on amazon[5] and on ebay automatically.

Items aren't synchronised the way back – nor from amazon and neither form ebay to the Quick Shop:

- If an item is sold in your Quick Shop, there isn't any effect to a marketplace like ebay.

- If an item is sold on a marketplace, there isn't any effect to your Quick Shop.

- If you change the properties of an item in the marketplace like ebay, this hasn't any effect to the properties of the item in your Quick Shop

ebay Marketplaces

Each ebay maketplace has different categories[6] and different shipping service costs.

Categories and shipping service costs are ready to use for:

- Germany - EBAY-DE/EUR (77)

- US - EBAY-US/USD (0)

See details at "Import the values for your marketplace" on page 22 below.

---

1   Amazon is under construction. I'm looking forward for a contract.
2   dito
3   dito
4   dito
5   dito
6   Near by 20.000 records per marketplace

Requirements

ebay

You need ebay accounts. See "Requirements" on page 21 below.

PHP

You need a PHP with a running Curl modul (php curl).

Quick Shop

You need the extension Quick Shop[1].

TYPO3 Versions

Deal! is developed for and tested with

- TYPO3 6.1

Maybe it is running too in

- TYPO3 4.5, 4.6, 4.7, 6.0 and 6.2[2]

---

1 See: http://quick-shop.de/. You can use Deal! for other shops too.
2 Please send your feedback to http://wildt.at.die-netzmacher.de/

Installation

Install and enable Deal![1]

Test it!

You can test Deal! immediately – without configuring the Extension Manager. See section "Test it!" on page 8 below.

Extension Manager

Configure Deal! with the Extension Manager.
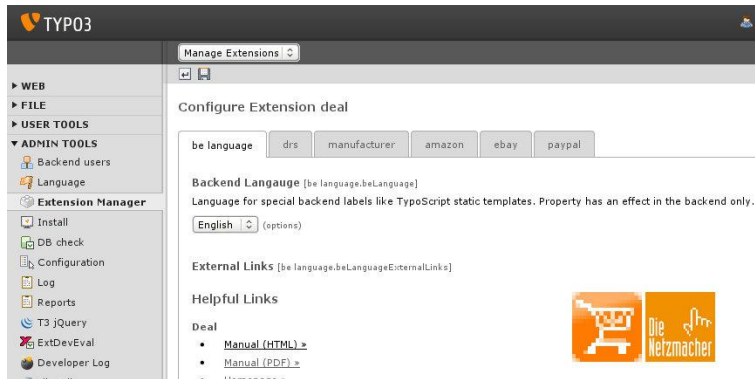

Illustration 4: Deal! extension manager

See details in the section "Extension Manager" on page 13 below.

Import values for your ebay marketplace

You are importing the needed values for your ebay marketplace supported by another Deal! Extension.

See details at "Import the values for your marketplace" on page 22 below.

---

1   http://typo3.org/extensions/repository/view/deal/

Test it!

You can test Deal! immediately – without configuring the Extension Manager.

Page and plugins

Test Deal! and ebay with the developer plugins:
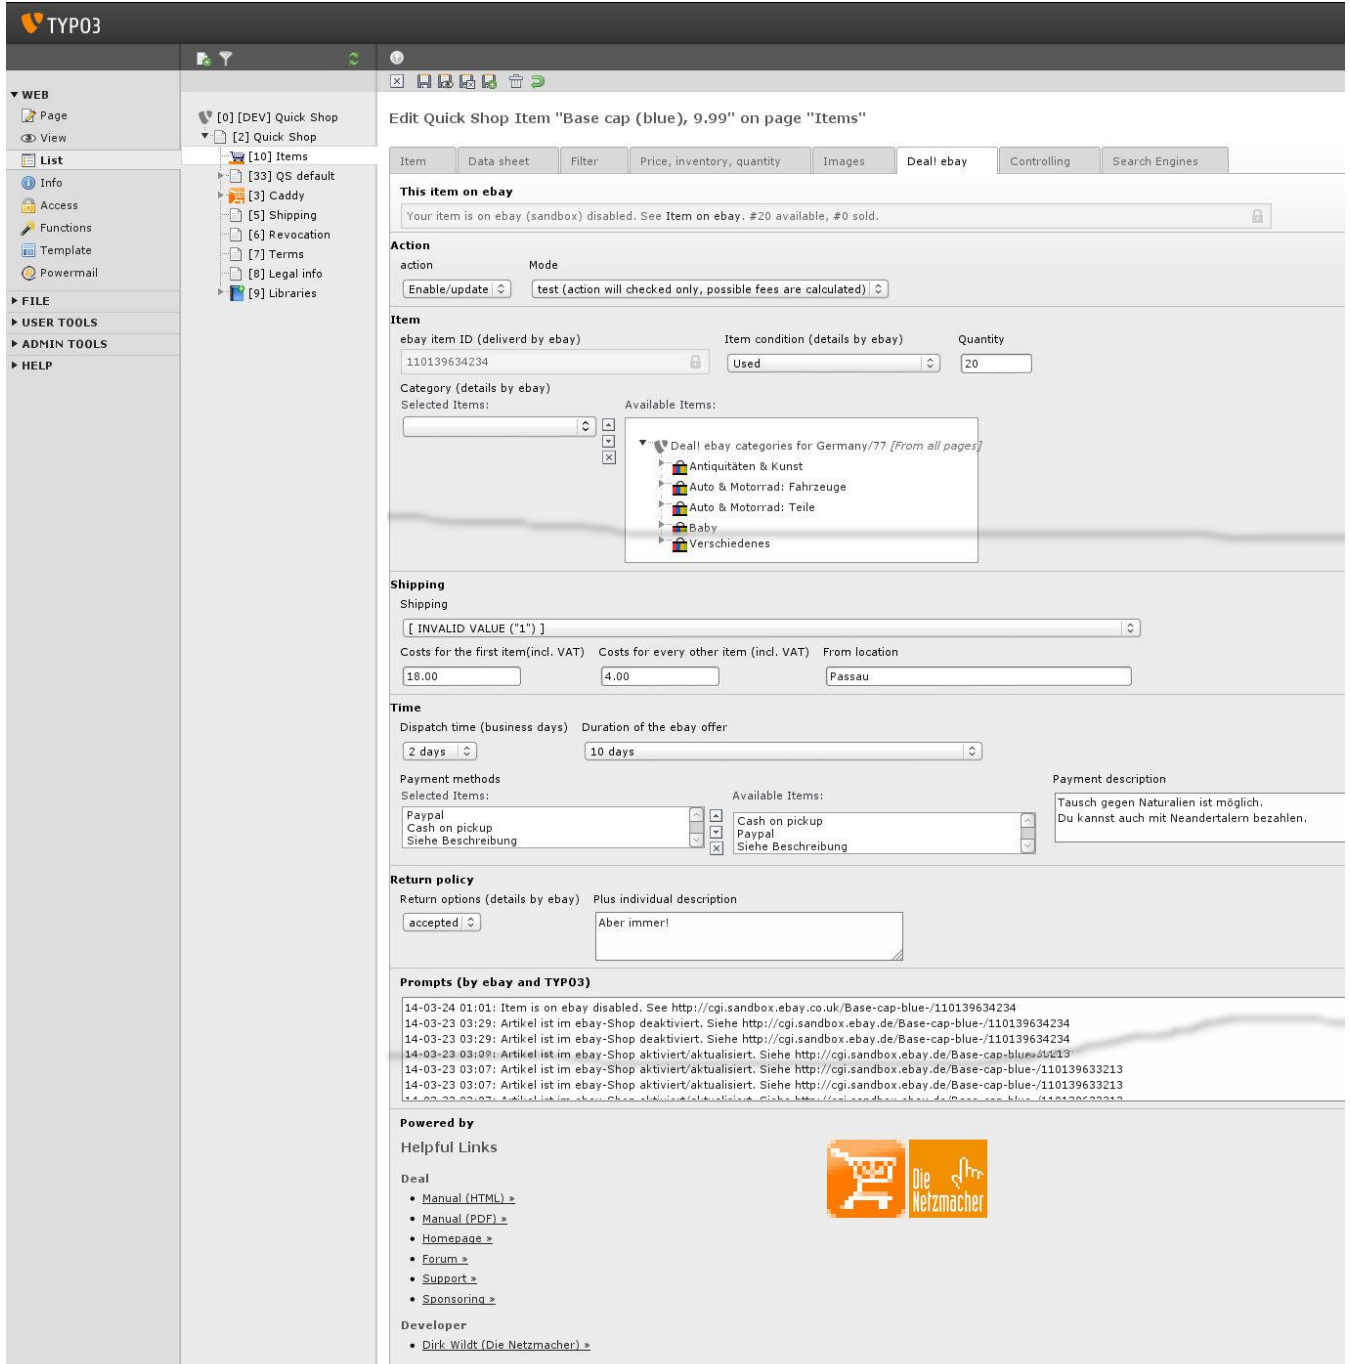

- Add a new page Deal!
- Add one of the both ebay plugins
    - Deal! [DEV] ebay 3 items
    - Deal! [DEV] ebay categories
- Add one of the both ebay Templates
    - Deal! [DEV] ebay 3 items
    - Deal! [DEV] ebay categories
- Configure the Templates with the TypoScript Constant Editor
    - [DEAL - DEV - EBAY 3 ITEMS]
    - [DEAL - DEV - EBAY CATEGORIES]

See details in the section "Plugins" on page 10 below.

Enable or update an item

[Deal! ebay] (Quick Shop)

A Quick Shop item has the new tab [Deal! Ebay], after enabling the Deal! extension. See illustration below.

Illustration 5: The tab [Deal! ebay] in the flexform of a Quick Shop item

This is the view for administrators.

Please configure the flexform view for editors by configuring a backend user group.

Enable or update an item

Action > Action [Enable/Update]. Action > Mode [Live]. Save the form.

Details

See "Flexform" on page 14 below.

Plugins

You don't need any plugin for use Deal!

Plugins are for testing and development only.

amazon

Not available.[1]

---

1   Amazon is under construction. I'm looking forward for a contract.

ebay

You don't need any ebay plugin for enable or update a Quick Shop item on an ebay marketplace.

Plugins are for testing and development only.

Deal! [DEV] ebay 3 items

Illustration 6: Plugin Deal! ebay 3 items

Functionality
- These plugin displays 3 items from the ebay shop.
- It is a quick and easy way to check, if you can use the ebay shop within TYPO3 in principle.

Properties
- Search word for the items (like TYPO3)
- Maximum amount for the items price
- ebay shop (like EBAY-DE or EBAY-US)
- currency (like EUR or USD)

TypoScript Constant Editor
- You configure the properties supported by TypoScript.
- See Constant Editor -> Category: [DEAL - DEV - EBAY 3 ITEMS]

Requirements
- You need your application ID from ebay. See "Requirements" on page 21 below.

Deal! [DEV] ebay categories

Deal! [DEV] ebay categories

Configuring

- You configure the properties supported by TypoScript.
- See Constant Editor -> Category: [DEAL - EBAY DEV - GET CATEGORIES]

Illustration 7: Plugin Deal! ebay categories

Functionality

- These plugin displays categories from the ebay shop.
- It is a quick and easy way to check, if you can use the ebay shop within TYPO3 in priciple.
- It is a draft for importing categories by CSV into your TYPO3 database.

Properties

- ebay marketplace (like Germany or US)
- Level limit
- Root category

TypoScript Constant Editor

- You configure the properties supported by TypoScript.
- See Constant Editor -> Category: [DEAL - DEV - EBAY CATEGORIES]

Requirements

- You need your Auth Key from ebay. See "Requirements" on page 21 below.

Reference

Extension Manager

be language

Property	Description

Backend Language	Language for special backend labels like TypoScript static templates. Property has an effect in the backend only.
	
	Values:
	  • English
	  • German

drs

Property	Description
Logging	DRS – Development Reporting System. Enable the prompting to the Modul > Admin Tools > Log. SECURITY RISK! Private data like token will prompt to the log table.

manufacturer

Property	Description
Company	Name of your company

amazon

Property	Description
Contracting	I'm looking forward for a contract. I would like to develop the interface for amazon. But I need a contract. If you are interested, please send me an e-mail. http://wildt.at.dei-netzmacher.de/

ebay

Property	Description

Environment	If no environment isn't selected, ebay is disabled. Each environment needs the keys below. BE AWARE:Production environment can effect costs on your ebay account!
	
	Values:
	  • [empty]
	  • Production
	  • Sandbox

Your marketplace	Country - Global ID/Currency (Site ID). See:https://developer.ebay.com/DevZone/merchandising/docs/Concepts/SiteIDToGlobalID.html BE AWARE: Categories and shipping service costs are provided by other Deal! extensions. See Manual below. Look for the section "ebay > Import values for marketplaces".
Error language	Australia (en_AU), Austria (de_AT), Belgium (Dutch) (nl_BE), Belgium (French) (fr_BE), Canada (en_CA), Canada (French) (fr_CA), China (zh_CN), France (fr_FR), Germany (de_DE), Hong Kong (zh_HK), India (en_IN), Ireland (en_IE), Italy (it_IT), Netherlands (nl_NL), Singapore (en_SG), Spain (es_ES), Switzerland (de_CH), United Kingdom (en_GB), United States (en_US)
Production Token*	OBLIGATED! Your token for the production environment. See your ebay account on https://developer.ebay.com/DevZone/account/default.aspx. See "Generate Token" on https://developer.ebay.com/DevZone/account/tokens/default.aspx. If you don't have a developer account, please register on https://developer.ebay.com/base/membership/signin/
Sandbox Token	Your token for the sandbox environment. It is obligated, if you like to use the sandbox. See your ebay account on https://developer.ebay.com/DevZone/account/default.aspx. See "Generate Token" on https://developer.ebay.com/DevZone/account/tokens/default.aspx. If you don't have a developer account, please register on https://developer.ebay.com/base/membership/signin/
Category Directory	Store ebay categories in the root directory (pid is 0). The root directory is recommended, if you are using one shop for the whole website only. Use [Item directories], if you are using more than one shop. You can use different categories per each shop. But you have to store the ebay categories for each shop manually. See manual below.

paypal

Property	Description
Production e-mail-adress	The e-mail-adress of your paypal account. It is needed, if you like to enable and update items on ebay. See https://www.paypal.com/
Sandbox e-mail-adress	The e-mail-adress of your sandbox paypal account. It is needed, if you like to test the enable and the update of your items on ebay without any fees. See https://www.sandbox.paypal.com/

Flexform

You have to save the form for any effect.

[Deal! ebay]

This item on ebay

Property	Description
This item on ebay	Status message with link to your item on the ebay marketplace.

Action

Property	Description
Action	Enable/Update: the item will be enabled or updated Cleanup: the item should cleanedup (but this isn't possible because of ebay restrictions) Disable: the offer will be disabled
Mode	off: nothing will happen live: action wll be executed, you can have ebay fees test: action will be checked only, possible fees are calculated (this isn't possible in some cases)

Item

Property	Description
Ebay item ID	ebay id of your item provided by ebay
Item condition	New New: others (see description) Refurbished by the manufacturer Refurbished by the seller Used For parts or not working

Return policy

Property	Description
Return options	Accepted (only). Details are delivered by ebay
Plus individual description	An individual description for the return options.

Log

Property	Description
Log	Log by ebay and TYPO3. You are allowed to remove the whole log.

TCA ctrl

Deal! is an interface. It is ready to use for Quick Shop. And you should use it for every other shop too.

The section TCA ctrl is the connector and mapper of Deal! for Quick Shop and every other shop.
See "Interface" on page 20 below.

ebay – Overview

Property	Data type	Description

ebay	array	Configuration of the Quick Shop items table (tx_quickshop_products).
		If you like to use Deal! for another shop, please replace tx_quickshop_products with the name of the item table of the other shop.
		
		Code:
		
		``php
		$TCA['tx_quickshop_products']['ctrl']['tx_deal'] = array(
		  'marketplaces' => array(
		    'ebay' => array(
		      'environment' => array(
		        'key' => $confArr['ebayEnvironment'], // sandbox, production
		        'production' => array(
		          'token' => $confArr['ebayProductionToken'] // obligate for
		                                                      // production environment
		        ),
		        'sandbox' => array(
		          'token' => $confArr['ebaySandboxToken'] // obligate for
		                                                      // sandbox environment
		        )
		      ),
		      'fields' => array(
		        'description' => array(
		          'datasheet' => 'datasheet', // optional (must be a TYPO3 table)
		          'description' => 'description', // obligate
		          'short' => 'short', // optional
		        ),
		        'ean' => 'ean', // optional
		        'filter' => array(
		          'category' => 'category', // optional
		          'dimension' => 'dimension', // optional
		          'material' => 'material', // optional
		        ),
		        'gross' => 'price', // obligate
		        'pictures' => 'image', // optional
		        'sku' => 'sku', // obligate: sku or uid
		        'title' => 'title', // obligate
		      ),
		      'manufacturer' => array(
		        'company' => $confArr['manufacturerCompany']
		      ),
		      'marketplace' => $confArr['ebayMarketplace'],
		      'paypal' => array(
		        'production' => array(
		          'email' => $confArr['paypalEmail'] // optional
		        ),
		        'sandbox' => array(
		          'email' => $confArr['paypalEmail'] // optional
		        )
		      ),
		    ),
		  )
		);
		``

ebay.environment

Property	Data type	Description

ebay.environment	array	All environment properties get their values from the extenson manager.
		You have to change nothing but the name of the item table (tx_quickshop_products).
		Please copy an paste this code into your extension.
		
		Code:
		
		``php
		$TCA['tx_quickshop_products']['ctrl']['tx_deal'] = array(
		  'marketplaces' => array(
		    'ebay' => array(
		      'environment' => array(
		        'key' => $confArr['ebayEnvironment'], // sandbox, production
		        'production' => array(
		          'token' => $confArr['ebayProductionToken'] // obligate for
		                                      // production environment
		        ),
		        'sandbox' => array(
		          'token' => $confArr['ebaySandboxToken'] // obligate for
		                                      // sandbox environment
		        )
		      ),
		      ...
		    ),
		  )
		);
		``

ebay.fields

Property	Data type	Description

ebay.fields	array	This is the field wrapper.
		Please look for the comments in the code below.
		
		ean: European Article Number
		
		If you like to use Deal! for another shop, please replace tx_quickshop_products with the name of the item table of the other shop.
		
		Code:
		
		``php
		$TCA['tx_quickshop_products']['ctrl']['tx_deal'] = array(
		  'marketplaces' => array(
		    'ebay' => array(
		      ...
		      'fields' => array(
		        'description' => array(
		          'datasheet' => 'datasheet', // optional (must be a TYPO3 table)
		          'description' => 'description', // obligate
		          'short' => 'short', // optional
		        ),
		        'ean' => 'ean', // optional
		        'filter' => array(
		          'category' => 'category', // optional
		          'dimension' => 'dimension', // optional
		          'material' => 'material', // optional
		        ),
		        'gross' => 'price', // obligate
		        'pictures' => 'image', // optional
		        'sku' => 'sku', // obligate: sku or uid
		        'title' => 'title', // obligate
		      ),
		      ...
		    ),
		  )
		);
		``

ebay.manufacturer

Property	Data type	Description

ebay.manufacturer	array	The manufacturer property gets the value from the extenson manager.
		You have to change nothing but the name of the item table (tx_quickshop_products).
		Please copy an paste this code into your extension.
		
		Code:
		
		<pre>$TCA['tx_quickshop_products']['ctrl']['tx_deal'] = array(
		  'marketplaces' => array(
		    'ebay' => array(
		      ...
		      'manufacturer' => array(
		        'company' => $confArr['manufacturerCompany']
		      ),
		      ...
		    ),
		  )
		);</pre>

ebay.marketplace

Property	Data type	Description

ebay.marketplace	array	The marketplace property gets the value from the extenson manager.
		You have to change nothing but the name of the item table (tx_quickshop_products).
		Please copy an paste this code into your extension.
		
		Code:
		
		<pre>$TCA['tx_quickshop_products']['ctrl']['tx_deal'] = array(
		  'marketplaces' => array(
		    'ebay' => array(
		      ...
		      'marketplace' => $confArr['ebayMarketplace'],
		      ...
		    ),
		  )
		);</pre>

ebay.paypal

Property	Data type	Description

ebay.paypal	array	The paypal properties get their values from the extenson manager.
		You have to change nothing but the name of the item table (tx_quickshop_products).
		Please copy an paste this code into your extension.
		
		Code:
		
		<pre>$TCA['tx_quickshop_products']['ctrl']['tx_deal'] = array(
		  'marketplaces' => array(
		    'ebay' => array(
		      ...
		      'paypal' => array(
		        'production' => array(
		          'email' => $confArr['paypalEmail'] // optional
		        ),
		        'sandbox' => array(
		          'email' => $confArr['paypalEmail'] // optional
		        )
		      ),
		    ),
		  )
		);</pre>

TCAdefaults

If you like to define default values for ebay properties of an item, please configure the PageTS – the page TypoScript – of the folder with the items.

See the snippet below.

Effect with enabled ebay mode only!

The ebay mode must be enabled und must not be off. If it is off, all default values won't have any effect.

Sample

```
TCAdefaults {
    // Default values for an item
  tx_quickshop_products {
      // ebay category: mattress
    tx_deal_ebaycategoryid = 131588
      // Shipping from location
    tx_deal_ebaylocation = 'Ibbenbüren'
      // ebay mode. If mode is 'off', default values won't have any effect
    tx_deal_ebaymode = test
      // Payment method
    tx_deal_ebaypaymentmethods = PayPal
      // Shipping service: DHL package
    tx_deal_ebayshippingservicecode = 17
      // Shipping costs for the first item: 18,00 EUR
    tx_deal_ebayshippingservicecosts = 18
  }
}
```

Interface

Quick Shop

The interface for Quick Shop consists of the following files and parts:

- ext_tables.php
  - Requires ext_tables/tx_quickshop_products/marketplaces/ebay/ext_tables.php
- ext_tables.sql
  - Fields for extending the Quick Shop
  - MM tables needed by Deal! for the Quick Shop
- ext_tables/tx_quickshop_products/marketplaces/ebay/ext_tables.php
  - Contains the TCA configuration (flexform configuration).
  - Quick Shop fields are mapped in the "TCA ctrl" section, which are needed by Deal!
    See: "TCA ctrl" on page 16 above.
- ext_tables/tx_quickshop_products/marketplaces/ebay/locallang_db.xml
  - Contains the localisation for the backend forms.

Other Shops

You are welcome, to use Deal! for any other shop.

Please take the Quick Shop as a draft for an integration of another shop. See "Quick Shop" on page 20 above.

Marketplaces

amazon

Under Construction

Amazon is under construction. I'm looking forward for a contract. If you are interested, please send an e-mail to

Import the values for your marketplace

Supported marketplaces

Deal! provides categories and shipping service costs for each marketplace with an extra extension.

- Germany - EBAY-DE/EUR (77)
    - Deal! ebay values for marketplace Germany/77
    - Import the needed ebay values for the German marketplace! Import is done while enabling this extension.
    - See: http://typo3-deal.de/typo3conf/ext/deal_ebay_000_us/doc/manual.pdf
- US - EBAY-US/USD (0)
    - Deal! ebay values for marketplace US/0
    - Import the needed ebay values for the US marketplace! Import is done while enabling this extension.
    - See: http://typo3-deal.de/typo3conf/ext/deal_ebay_000_us/doc/manual.pdf

Non supported marketplaces

If you like to integrate a non supported marketplace into Deal!, please

- make a copy of the extension deal_ebay_000_us to deal_ebay_xxx_yy
- import the categories and shipping service codes to this extension
- maintain the Deal! files:
    - ext_tables.php
    - ext_tables.sql
    - locallang_db.xml
    - tca.php

You get a list of the needed categories by the Deal! plugin. See: "Deal! [DEV] ebay categories" on page 12 above.

You get a list of the shipping service codes at ebay.
See: http://developer.ebay.com/DevZone/XML/docs/Reference/ebay/types/ShippingServiceCodeType.html

If I should integrate the values for the marketplace, please send me an e-mail at http://wildt.at.die-netzmacher.de/.
This support isn't without fees.

Development

You can test requests supported by the API Test Tool:

- https://developer.ebay.com/DevZone/build-test/test-tool/default.aspx

Known Bugs

Error prompts after saving a new item

If you are saving a new item, you will get error prompts.

Reason

TYPO3 is generatig the id for the new item while saving the new record and after the data are send to the ebay interface.

Solution

Save a new item twice.

Item link to ebay is broken in TYPO3 6.2

The link to the item in the ebay shop is broken in the TYPO3 backend.

Further Information

Credits

Made in Nature

The German TYPO3 agency Made in Nature has contracted

- a part of the Deal! Extension

Website

- http://made-in-nature.de/

Other extensions published by Die Netzmacher

- **+AOE Linkhandler Configurator**: Configure the AOE linkhandler supported by userinterfaces. Out-of-the-box templates for cal, org, tt_news and tt_products. Don't edit page TSconfig any longer. http://typo3.org/extensions/repository/view/linkhandlerconf/

- **autositemap**: A smart site-map optimised for the footer. It groups menus in columns. Great menus will get two columns. Configuration is based on TypoScript HMENU. http://typo3.org/extensions/repository/view/autositemap/

- **Browser** – TYPO3 without PHP. Develop your TYPO3 extension 8 times faster! You need one line TypoScript for a result list with a search form, a record browser and an index browser. Images are wrapped self-acting. SEO, Search Engine Optimization, is integrated. http://typo3.org/extensions/repository/view/browser/

- **Caddy** – the TYPO3 shopping cart. You can use it for your own needs. You need a database with products or any other items only. You can install Caddy out of the box with one mouse click – see Quick Shop below. http://typo3.org/extensions/repository/view/caddy/

- **Deal!** – TYPO3 Quick Shop interface for the marketplace ebay. Manage all items with TYPO3 and publish it on ebay. Amazon is under construction. http://typo3.org/extensions/repository/view/deal/

- **Flip it!** offers lovely and smooth page flip transitions. It enables you to run over pages in PDF documents like in a real magazine. It is based on flash. Flipt it! can convert PDF documents to swf files automatically. http://typo3.org/extensions/repository/view/flipit/

- **Green Cars (Grüne Autos)** - Database optimized for ecological cars. It is a case study and demonstrates, how to get a complex database with the browser (see above) in three hours only. http://typo3.org/extensions/repository/view/green_cars/

- **Jobmarket** is a catalogue with job offers. Views, the a-z-browser, the page-browser, the search, social bookmarks and a lot of other stuff can configured by the Browser plugin with the mouse. Job Market hasn't any PHP code, it should be easy to adapt it to your needs. http://typo3.org/extensions/repository/view/job_market/

- **Majordomo**: For subcribing to and unsubscribing from a majordomo mailing list. http://typo3.org/extensions/repository/view/majordomo/

- **Organiser** – TYPO3 for the lobby and the organisers. Handle news, events, staff, headquarters, locations, workshops and a calendar with one extension. Sell online tickets! Install the Organiser with one mouse click! http://typo3-organiser.de/

- **Quick Shop** – the fastest shop in the history of TYPO3. Install it with one mouse click! Quick Shop is based on the browser (see above) and powermail. http://typo3-quick-shop.de/

- **PDF Controller**: Easy to install. Add to your HTML page the PDF-controller-button. Link from the button to the controller. Adjust the controller by mouseclicks. The PDF Controller supports CSS 3. http://typo3-pdfcontroller.de/

- **Radial Search (Umkreissuche)** – Enable the browsing through your data by geo location. 'Your data must have a latitude and a longitude. Address data can geocoded automatically by the Browser - TYPO3 without PHP. http://typo3.org/extensions/repository/view/radialsearch/

- **Route** – Publish your routes with GoogleMaps or OpenStreetMap. Routes have points of interest (POI). You can categorise and filter both: routes and POI. Address data can geocoded automatically. http://typo3.org/extensions/repository/view/route/

- **seo_dynamic_tag**: Search Engine Optimization for the title tag, the canonical tag and the meta tags author, description and keywords. Configuration by a user interface. http://typo3.org/extensions/repository/view/seo_dynamic_tag/

- **TSconfig Pages and Users by extManager (extkey: tsconf)**: Configure the the eight most commonly used TSconfig porperties with the mouse - like page tree uids, activated extended view, activated clipboard, ... http://typo3.org/extensions/repository/view/tsconf/

Todo

Repair item link to ebay

The link to the item in the ebay shop is broken in the TYPO3 backend from TYPO3 version 6.2:

Change Log

1.0.0	**Major Feature**	

Major Feature
* #62175: Upgrade TYPO3 6.2
Bugfix
#i0015: If backend is running in https, image URL get the https-protocol.

0.1.3   **Improvements**
* #i0020: Title is moved from 'Deal! Quick Shop interface for ebay' to 'Deal! TYPO3 for ebay'

0.1.2   **Improvements**
* #i0019: default values
* #i0018: ebay error 290: you are not the owner
* #i0017: subtype_value_field, subtypes_excludelist
* #i0016: #i0015 is canceled
       Reason: Without filled fields the user gets a lot of error and warning messages.
* #i0015: required is removed from quick shop fields
* #i0013: Extension Manager Labeling
Bugfix
* #i0014: tx_deal_ebayApiBase::setEbayItemStatus (#1994): ebay status is undefined: ""
       * reason: if an item isn't available any longer, ebay doesn't return any status
       * add news status: isWoStatus

0.1.1   **Improvements**
* #i0012: TCA > tx_deal_ebayaction > donothing: comment out

0.1.0   **Manual**
* #i0011: Initial manual
Development
* #i0010: Extension Manager
       * Category Directory
* #i0009: ext_tables_static+adt.sql
       * tx_deal_ebaycategories_000 (US)
       * tx_deal_ebaycategories_077 (Germany)
Improvements
* #i0008: Plugin Deal! [DEV] ebay 3 items
Cleanup
* #i0007: Move
       * plugins/marketplaces/ebay/samples/php/ -> plugins/marketplaces/ebay/dev/
       * static/marketplaces/ebay/samples/php/ -> static/marketplaces/ebay/dev/
* #i0006: Remove
       * lib/marketplaces/ebay/samples/
       * plugins/marketplaces/ebay/samples/php/GettingStarted_PHP_NV_XML/

0.0.3   **Development**
* #i0005: ebay addItem – remove
* #i0004: ebay addFixedPriceItem ready to use
* #i0003: ebay addItem - step 1/2: framework

0.0.2   **Development**
* #i0002: TCA for tx_quickshop_products - step 1/2: framework

0.0.1   **Initial release**
